

Hoe ververs ik de cache van mijn Magento webshop?

Alvorens je de Magento cache kunt verversen, dien je in te loggen in de Magento backend. Vervolgens navigeer je naar *System (Systeem) > Cache Management (Cache Beheer)* en **klik** op de *Flush Magento Cache* knop.

The screenshot displays the Magento Admin Panel interface. At the top, the header includes the logo for 'TOTAL INTERNET GROUP ADMIN PANEL', a search bar, and user information: 'Ingeleid als admin | maandag 10 december 2012 | Log uit'. The main navigation bar contains various menu items: Dashboard, Verkopen, Catalogus, Mobiel, Klanten, Promoties, Nieuwsbrief, CMS, and Rapporten. A dropdown menu for 'Systeem' is open, listing options such as 'Mijn account', 'Meldingen', 'Hulpmiddelen', 'Web Services', 'Ontwerp', 'Importeren/Exporteren', 'Manage Currency', 'Transactionele e-mails', 'Custom Variables', 'Rechten', 'Magento Connect', 'Cache-beheer', 'Index Management', 'Beheer winkels', 'Order Statuses', and 'Configuratie'. The 'Cache-beheer' option is highlighted with a red circle and a mouse cursor. In the top right corner, there are two orange buttons: 'Flush Magento Cache' and 'Flush Cache Storage', both with red circles and mouse cursors. The main content area is titled 'Cache Storage Management' and features a table with columns 'Cache Type' and 'Beschrijving'. The table lists various cache types like 'Configuratie', 'Layouts', 'HTML-output van blokken', etc. Below the table, there is an 'Additional Cache Management' section with two buttons: 'Flush Catalog Images Cache' and 'Flush JavaScript/CSS Cache'.
